ADMISSION: Adults 60c
All Children under 12 30c
WAR TAX INCLUDED

Lemons.

Many persons may not know that the scent and flavor of lemon peel reside in minute cells, close to the surface of the fruit, and that by slicing it thin they will cut through these innumerable cells and thus obtain double the quantity of the essential oil that could be procured by anyone careless of this fact. The cells being cut through, it follows that a great part of the oil remains on the white of the lemon. This is easily abstracted by rubbing a lump of sugar over it.

Must Sleep or Die.

Quoth Sir Thomas Browne, "One-half our days we pass in the shadow of the earth and the brother of Death extracteth a third part of our lives." Why should we give so many hours to sleep? For the purpose, we suppose, of giving the body rest. But during the sleep no physical or mental function is entirely at rest. We do not know why we must sleep. We only know we must sleep or die."

Didn't Want to Miss Anything.

Monday a peddler came to our door and was demonstrating some of his wares to my mother. My mother bought a few articles from him and he started to put his suitcase in order. He finished and was just leaving when Joseph, who is four years old, rushed in and asked: "Oh, mamma, what did the man say while I wasn't here?"—Chicago American.

Cats a Source of Danger.

Cats are great carriers of disease germs, and scratches from their claws are sources of real danger, as those claws are generally coated with a mass of germs which may cause infection, and for these reasons alone should not be allowed to associate too intimately with young children whether the latter are asleep or awake.

Materials in Wren's Nest.

The wren carries a lot of material to the box or hole cavity in which the nest is constructed. If the box in which wrens are building is a foot square they will fill it full of material—straw and grass and hair and fiber of one kind or another. They do not use any mud, as the robins do.

Empire Teaches Ten Commandments.

In almost every part of the British empire provision is made for children to learn the ten commandments in school hours. A New Zealand circular urges that "a knowledge of these laws is in the interests of character building and good citizenship, and is also an aid to good government."

Houses Built of Rosewood.

A church building, a courthouse and four dwellings, that comprise the settlement on Pitcairn Island, in the eastern part of the South Pacific, are built entirely of rosewood. The furniture is made of the same rare wood, which grows plentifully on the island.

Somebody's Ears Are Burning.

Some men will look you straight in the eye while you dig down in your pocket to pay for the gas you are using to give them a joy ride to which they have invited themselves.—American Motorist.

Joint Snake's Tail Is Fragile.

The joint snake, or glass snake, is a limbless lizard of the southern United States, superficially resembling the snake. It is so called from its fragility, the tail easily breaking into small pieces.

His Seventy-Seventh Bear.

Gintzen, a merchant of Khabars has the reputation of being the greatest bear hunter in Siberia. He is eighty-five years old and has just killed his seventy-seventh bear.

As She Saw the Elephant.

Little Catherine, aged four, saw an elephant at a circus for the first time. Looking at it, she exclaimed: "Oh, mamma, look at the fat horse with a tail near his eyes."

Scant Comfort.

One positive service performed by visiting wife's relatives is eating so much that there aren't so many leftovers for next day.—Ohio State Journal.

The Milk Bottle Only.

Skagit County Times: "The first duty of the American people is to prepare the youth of the land for the bottle of life."—Boston Transcript.

Nabobs Among Moroccans.

In Moroccan encampments the tents of persons of note are often topped with copper balls and decorated with arabesques of cloth.

Opportunity.

The space between a man's ideal and the man himself, is his opportunity.—Margaret Deland.

Pearls.

The most valuable pearls are round; next come the pear-shaped, and lastly the egg-shaped.

No Accounting for Tastes.

The inhabitants of Cochichewick prefer rotten eggs to fresh ones.

Mr. Roy Despeaux of New Orleans, visited his mother, Mrs. Clinton Pickett here, returning in the first part of the week.

ECZEMA
Money back without question if HUNT'S Salve fails to cure the treatment of ITCH, ECZEMA, RINGWORM, YETTER or other itching skin diseases. Try a 25 cent box at our risk.

YOUNG'S DRUG STORE.

Varnish to Imitate Ground Glass.

To make a varnish to imitate ground glass dissolve 90 grains of sandarac and 20 grains of mastic in two ounces washed methylated ether, and add, in small quantities, sufficient benzine to make it dry with a suitable grain. To little making the varnish too transparent and an excess making it crapy. The quantity of benzine required depends upon the quality, from one-half to one and one-half ounces, or ever more. The best results are obtained from a medium quality. It is important to use pure washed ether, free from spirit.

Kill Is His Motto.

No mammal in the entire world, great or small, can compare with the weasel as hunter. They hunt their prey incessantly, following it by scent, and take the lives of a far larger number of victims than they need for food, says the American Forestry Magazine. They kill, and keep on killing just for the fun of it; and it is only during the cold winter weather, when game becomes scarce, that they content for future consumption the bodies of some of the animals they have slain.

Leather From Rat Skins.

That the skin of the rat can be used for leather has been proved, even though an experiment with some thousands of skins imported from France proved in the nineteenth century that the manufacture was not commercially worth while. A pair of shoes made from the skin of the rat proved as soft as the finest kid, but it took six skins to make the one pair, only the back being stout enough for use.

Blood Pressure.

Blood pressure is the pressure of the blood against the walls of the large arteries. It is determined by the force of the heart and the resistance in the small blood vessels. Those latter either expand or contract according to conditions. This action is influenced by various factors, namely, excitement, nervousness, poisons in the system and hardening of the arteries.

Curious Pettery.

The use of dried fruits of trees, such as the gourd and the coconut, for holding water and liquid substances is familiar, but it is not so generally known that cups, saucers and jars to take the place of ordinary earthenware are made in the Orient of a glutinous and plastic material entirely of vegetable origin, which is easily moulded and dried.

Ancient Money.

The first coins used by the civilized nations of the ancient world were small metal ingots stamped with a ruler's seal. It is probable that they were first minted in Lydia, the rich Asian kingdom of which Croesus was the most famous king. The "punch-marked" coins of India are assigned to a period older even than that of Buddhism.

Bass Drum and Viol in One.

An orchestral percussive instrument that combines the booming resonance of the drum with the range of the double bass viol, according to Popular Mechanics, is the latest in Russian musical novelties. In form it is a combination of both instruments, the four foot finger board being fixed to a skin covered drum.

Walk Around a Ring.

A Tennessee investigator made a series of more than fifty experiments for the purpose of disproving the assertion that blindfolded persons walk in circles, but he was unable to do so, for all the persons in the tests departed from the straight line as they walked away from the starting point.

Official Tattooing.

In some countries tattooing is adopted for several purposes. For example, in Samoa, when a woman is married several tattoo marks are placed on her, and both in Fiji and Samoa the birth of each child is registered in this way on the mother's hand.

Mahogany Tropical Tree.

The true mahogany grows only in tropical countries, particularly in Central America, the West Indies, Mexico and Peru, though small ornamental trees are grown in southern Florida. The western sumach or mahogany grows in lower California.

He Has It Coming.

"Shouldn't getter husbands have heavier damages?" was a question raised in a recent divorce action. The better opinion is that the fact that the ugly man must have gone out of his way to get married should tell against him.—Punch.

BOARD ALLOWANCES.

Thompson, 1 day member Pension Board, \$3; S. Bradford, 1 day member Pension Board, \$3; T. E. Ramsay, 1 day member Pension Board, \$3; P. A. Roberts, dipping cattle and labor hired, \$145.75; L. J.
